

This line of code, "\$Date: 2016/03/18 23:37:07 \$", is a **version control marker that indicates the date and time a specific file was last modified in a software development environment**; in this case, the file was last updated on March 18, 2016, at 23:37:07.

### **Key points about this line:**

- **Purpose:** It is commonly used in source code to track changes and identify which version of a file is being used.
- **Format:** "Date:" followed by the date and time in YYYY/MM/DD HH:MM:SS format, with a dollar sign (\$) at the beginning and end to mark the line as a special identifier.
- **Version control systems:** This type of marker is often automatically generated by version control systems like Git or SVN when a file is committed.
